DETAILED ACTION

This office action is a response to the amendment filed on 3/24/2006.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 22-25 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Re. Claim 22: The phrase "applying an etchant in an inverse pattern to said predetermined pattern to said metal layer" as recited in lines 4-5 were not described in the specification as originally filed and appear to be new matter.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-3, 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lake (US PAT. 5,987,739) in view of Mast (US PAT. 6,501,059).

Lake teaches a process of making an antenna comprising steps of applying a metal layer on a dielectric substrate (14); removing a portion of the metal layer to form a plurality of antennas (29, as per claim 2) by etching process as shown in Fig. 1; and placing an optical structure (20) on the metal of the antenna as shown in Fig. 2 (see also col. 3, line 63 to col. 4, line 34).

Re. Claim 3: Lake also teaches that the plurality of antennas can be separated.

Re. Claims 7 and 8: The film shape of the substrate is made of a polymer material.

However, Lake fails to teach the etching process by using a flexographic printing press. Mast teaches a process of applying an etchant material by flexographic printing in order to have desired patterns (col. 17, lines 22-28). Therefore, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to modify a process of demetallization of Lake by using a flexographic printing as taught by Mast in order to have desired patterns.

Allowable Subject Matter

5. Claims 4-6, 14, 15 and 31-34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments with respect to claims 1-8, 14, 15, 22-25 and 31-34 have been considered but are moot in view of the new ground of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
